THE "SKEWER" RETURN MECHANISM

All indoor rowers with serial # 84-8 to 85-66, or with serial #Nov.4, 1985 and after have an improved return mechanism assembly which is far easier to install than previous systems. This assembly is retrofitable to all Concept2 Model A Indoor Rowers. No modifications are required to use the skewer in indoor rowers with serial #83-13 and up (these machines are easily identified by the black arms and feet, not chrome plated). For older machines, serial # 83-12 and lower or no serial number at all, a modified leg bolt set is available at the cost of $1.45.

Order PN 343.

EXPLANATION OF CONCEPT2 INDOOR ROWER SERIAL NUMBER

All Model A Indoor Rowers manufactured after October 1, 1982 have a serial number located on the bottom edge of the chain guide mount board. On November 4, 1985, we started using the date of production as the serial number. Between October 1, 1982 and November 4, 1985 we used a four digit numbering system. The first two numbers indicate the year in which the machine was made, and the rest of the serial number identifies the run number. Thus, a serial number of 83–12 identifies the indoor rower as the twelfth run of 1983. If your indoor rower was made before October 1, 1982, it will not have a serial number. Please identify these machines by writing the purchase date whenever the serial number is needed.
