DIAGNOSTICS: SYSTEM TEST – FRAME TAG EEPROM MODE
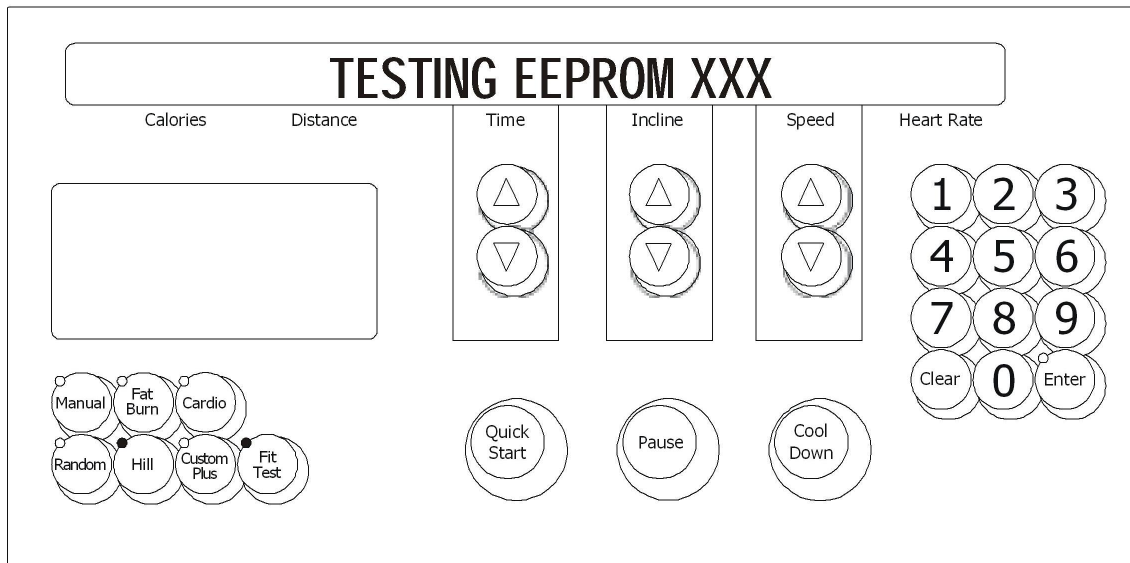

This test allows the user to test the frame tag EEPROM. This test will read/write/replace all used locations in the frame tag EEPROM. If there is an error, the bad location will be displayed. The following is a list of current information that can be seen. If an error has occurred, refer to the troubleshooting section for corrective action.

ERROR CONDITION	DISPLAYED INFORMATION
FRAME EEPROM COMM BAD	TESTING FRAME EEPROM
FRAME TAG UNPLUGGED	EEPROM TESTED GOOD
	EEPROM BAD AT XX

Press the 'CLEAR' key to exit the Frame TagEEPROM test and return to the System Test Menu.
