

***Important Information about Body Masters Belts -- Please Read!**

Body Masters utilizes three different belts on its fitness equipment, and it is very important when maintaining and replacing belts on Body Masters equipment to use the correct belt. **Failure to use the correct replacement belt can reduce the life of the belt and may result in serious injury to the user. All belts must be replaced after 1 year regardless of usage. All polyamide and kevlar belts are date stamped when purchased. If the date stamp on a belt is more than 1 year old or does not have a date stamp it must be replaced!** If you have any questions about the proper selection or installation of belts on Body Masters equipment, please call customer service at 1-800-325-8964
