

Handlebar Sleeve Removal

Studio 5 (9-7280)

This document describes the procedure for removing the replacing the Star Trac Studio 5 bike's handlebar sleeve.

Tools Required:

- Adjustable Wrench
- #3mm Hex Key or Similar

1. Loosen the handlebar adjustment pop pin, then pull pop pin outwards while pulling up on the handlebar assembly to remove the handlebars (Fig. 1)

Fig. 1

2. Using an adjustable wrench, remove the handlebar adjustment pop pin from the frame (Fig. 2)

Fig. 2

3. Once the pop pin is removed, use a #3mm hex key or similar tool to push the handlebar sleeve retaining clip button in while pulling up on the handlebar sleeve to remove the sleeve (Fig 3)
