

## Display Wiring

### TR4500

This is the wiring diagram for the TR4500 Display Electronics. Note the Side Stop Switch connection. The two-wire extension cable should plug onto the center two pins of the "Stop Sw" connector.

If your model does not have a Polar Receiver but has contact heart rate, there will not be a Heart Rate Combiner Board. Connect the Contact Heart Rate Board directly to the "HR" connector on the display electronic assy.
